

Every mail piece touched by software for the ultimate in accuracy and control.

Digital Inserter Base

New! All-steel, high-volume, digital mailing machine for production folding/inserting equipment.

DB

Full interface with any intelligent inserter base in the world!

HP 45A technology for the lowest ink-jet mail printing costs in the industry

All-steel construction and stainless steel ball bearings like the very best mailing inserters

New industry regulations? Our off-the-shelf Dell PC with 15" color touch-screen lets you adapt immediately

High-speed, weigh-in-motion feature for mixed mail replaces tandem- and triple-meter setups.

Exclusive! Full accounting is standard.

Complete accounting by job, account, class, operator and unit is included — at no additional cost — with each mailing machine. Plus, pre-sort reporting by weight, rate, account and job! Upgrades are provided as they become available.

Want more? Postage can be set on the operator's mailing machine direct from the web via your manager's high-speed PC using Data-Pac's eSmart Mail Manager software.

And, multiple mail permits can be printed on demand for even more convenience and economies!
