QTrak Package Logging System:

- Your mobile device becomes a high-speed smart scanner and quickly captures carrier tracking information, time of receipt, and the person who received the package.
- Look up recipient's location information on your smart phone and have QTrak send an email notification.
- At delivery the iPhone/iTouch becomes your digital signature pad. Instantaneously recording to whom the package was delivered, recipient's signature, messenger name, date, and time of delivery.
- When research is required your QTrak web portal is the depository of all your package detail. Using our Google search feature you can retrieve comprehensive package delivery information in seconds.

QTrak Asset Tracking System:

- Create bar codes for any item and track it's movement and location by scanning the asset and either scanning or entering a location.
- Capture signatures for high value assets.
- Detailed movement information is sent to the cloud real time.
- Export information to excel for quick asset audits.

Common Applications: Doormen Attended Residential Buildings, Corporate Package Receiving Areas, College Mailrooms, File Rooms, Hotel Business Centers, Trade Shows, and Equipment Sign Out Desks.
