HERE'S HOW IT WORKS

SCAN TRACK® IS EASY TO LEARN & EASY TO USE

Automated functions require fewer keystrokes and clear, bright, intuitive screens make Scan Track easy to train and easy to use. Your employees can triple their productivity in as little as ten minutes!

Don't waste another minute tracking a lost parcel, package or item. Track people or any item anywhere, at any time.

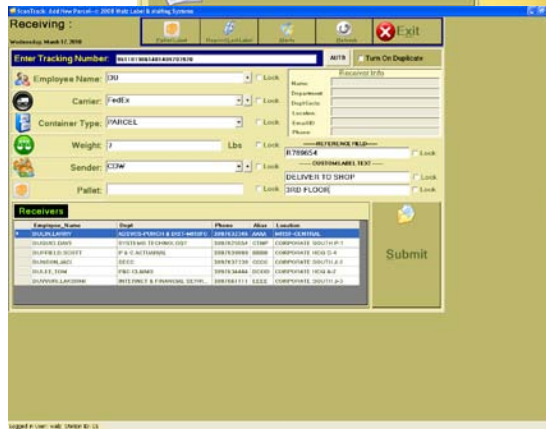

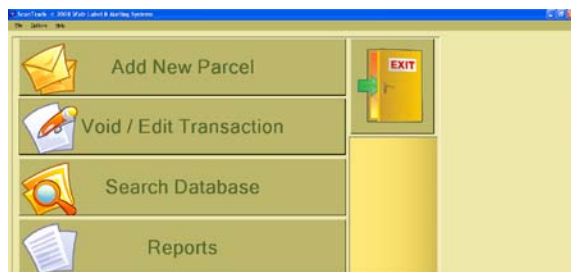

1

1. Scanned Entry
The wireless receiving scanner logs your carrier and delivery date into system.

2

2. Recipient ID
Your operator speaks the recipient's name, the receiving screen identifies recipient and sets up delivery routing.

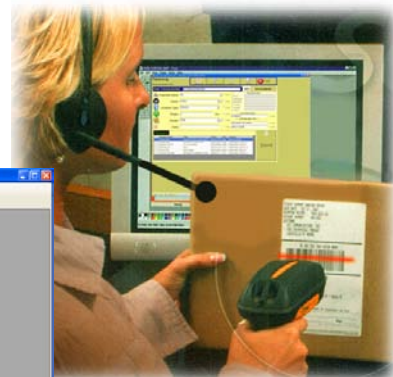

3

3. Signature Capture
A signature capture device or signature pad enables delivery verification.

4

4. Desktop Tracking
With its 100% browser-based module, Scan Track allows delivery searches and pickups to be performed, and alerts to be scheduled, right from the desktop. The recipient's signature will appear right on the user's screen!
