ChromaJet Series

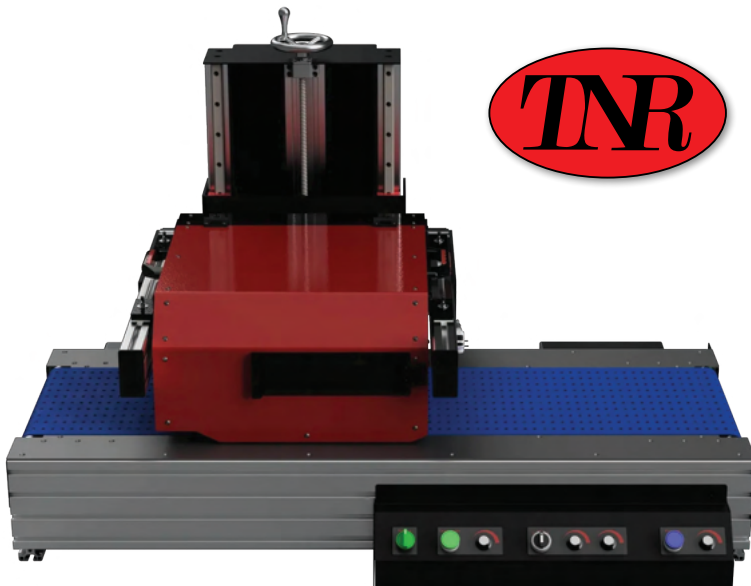

Floor Model with Feeder
and Conveyor

The TNR ChromaJet series printer is truly a "One Size Fits All Machine". Whether being used for envelopes, boxes, brochures or other custom items such as coffee sleeves, coasters or napkins, the options are nearly endless. Using a pigmented ink that will not run when wet, which opens the door to many different types of print media and applications.

The Chromajet series is capable of printing images up to 11.7" wide, 36" long full bleed at upto 1200x1200 dpi. With speeds up to 18 inches per second, fast production speed can be achieved. Built with a standard 8" maximum head height*, helps significantly thicker products, such as preformed boxes and other larger items.

A two zone, variable speed true vacuum product hold down for difficult media limits waste while increasing profits. An open front design allows for hand feeding of oversized media such as flat boxes. True PMS color matching allows exact color configuration for custom logos and other prints where it is important for color to match exactly.

ChromaJet Series

The ChromaJet Series system can be purchased in many different configurations, from the base itself, all the way up to a base with a speed controlled feeder, and conveyor. We have a popular option to configure it as a floor model machine with cabinetry, a monitor and keyboard mount. This feature works great for an easy integration into your existing production line. The ChromaJet Series also offers many custom options such as the ability to customize the machines height* and feeder dimensions at the time of your order.

Contact us with any questions and pricing.

Our options include but are not limited to:

- Napkin Feeder
- TNR Feeder w/ integrated acceleration/alignment table (Size customizable)
- Catch tray or Conveyor.
- Monitor and keyboard mount
- Production height leg integration (height customizable), with a full cabinet and shelf as a further option
- Computer with pre-configured software
- Motorized head height adjustment
- Max head height can also be customized at order.

Future options (*will be available to add on*):

- Production Auto loader to be integrated with TNR feeder
- One touch automated head height adjust
